

CERTIFICATE OF CONFORMANCE

The MULTICONE is developed to eliminate the risk of a Ferrule Secured Eye Termination (FSET) getting caught in objects in the surrounding by the tapered design. This solution complies with the requirements in EN 13411-3 in respect of having an inspection hole to make the free end of the wire rope visible after pressing for the conical part. The strength of the FSET is not affected in any way!

MULTICONE is a product used as a conical cover for the free wire rope end of the ferrule securing termination of the T ferrule, UM ferrule, and STS ferrule.

This is a Design protected solution owned by Talurit AB.
Registration number 598917-0001 and 85.002.

MULTICONE is not a load bearing product and therefore not applied as a product following any specific standard. The inspection hole and the conical part of the MULTICONE are although following the requirements in EN standard 13411-3, Annex A.

It is confirmed that if MULTICONE from Talurit AB is processed in a manner as per TALURIT Ferrule Securing Instruction and instruction as per data sheet, these products are covered by a Product Liability Insurance of a value up to SEK 30 million.
