

CERTIFICATE OF CONFORMANCE

To meet the safety regulations for ferrules Talurit AB hereby certify these products to be in accordance with applicable standards. EN 13411-3 is the technical standard for ferrules type ST, SLST, and STS.

ST, SLST, and STS ferrules have been validated according to EN 13411-3 regarding ferrule secured eye termination.

We hereby confirm that the material selected conform to the same specification as used when satisfying the type tests. The material is non-alloy carbon steel in normalized condition.

Wire rope: These carbon steel ferrules applies to single layer round strand ropes with metallic core. Wire ropes shall conform to EN 12385 -4 and 5 class 6 x 36, maximum rope grade is to be 1960, fill factor 0,58-0,60. For other classes, rope grades and fill factor verifying test must be performed. Steel wire ropes with a fiber core has not been tested.

It is confirmed by this certificate that ferrules from Talurit AB conforms to the above mentioned standards. It is also confirmed that if ferrules, tools and machines from Talurit AB are processed in a manner as per TALURIT Ferrule Securing Instruction and other applicable instructions, these products are covered by a Product Liability Insurance of a value up to SEK 30 million.
